Allowable Subject Matter

Claims 1-12 are allowed.

The following is an examiner's statement of reasons for allowance: the claims are directed toward a non-aqueous electrolyte battery comprising an electrolyte including a compound represented by formula (1) in claims 1 and 8. At least one of R1, R2 or R3 in formula (1) is a straight chain alkyl group containing a carboxyl group or a branched chain alkyl group containing a carboxyl group. The compound forms a film on the surface of a negative electrode.

The prior art does not teach the electrolyte compound of formula (1) wherein the compound contains a straight chain alkyl group containing a carboxyl group or a branched chain alkyl group containing a carboxyl group.

Suemori et al., JP 07-192757, teaches a nonaqueous electrolyte battery comprising a positive electrode, a negative electrode and a nonaqueous liquid electrolyte (0001). The nonaqueous electrolyte additionally contains at least one of tris(2-hydroxyethyl) isocyanurate, triaryl cyanurate, triallyl isocyanurate or derivatives. However, none of the compounds disclosed by Suemori contain a carboxyl group.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tracy Dove whose telephone number is 571-272-1285. The examiner can normally be reached on Monday-Thursday (9:00-7:30).

Art Unit: 1745
